#### Customer Problem Statement Template:

Many citizens face significant challenges when trying to register complaints with government departments, service providers, or support systems. The existing processes are often manual, outdated, and fragmented, leading to delays, miscommunication, and lack of transparency. Users frequently remain unaware of the current status of their complaints and have no proper mechanism to track or follow up on unresolved issues. The absence of a centralized and user-friendly platform results in frustration, inefficiency, and a loss of trust in the system. Without real-time updates or clear accountability, complaints may go unaddressed or ignored. This highlights the need for a digital solution that enables users to easily lodge, track, and manage complaints while improving communication and ensuring timely resolution.
